Acetone — cleaning solvent

Four solvents do most of the wiping on a sheet metal repair: MEK, acetone, isopropyl alcohol and a dry cleaning solvent.

Designation

Item	Value
Designation	Acetone
Class	Chemicals
Type	cleaning solvent

Data from the guide

Item	Value
Solvent	Acetone
Flash point (NIOSH)	0 F (-18 C)
Typical use	Degreasing, resin thinning
Watch for	Attacks plastics and finishes; fire risk with conversion coat

Flash points: CDC NIOSH Pocket Guide, Fahrenheit as published; Celsius converted. Always the SDS of your product first.

Notes

- **No procedures.** The SRM and AMM name the cleaner for each task.
- **No grade numbers.** The sources do not give solvent specification numbers for shop use.
- **Flash points are NIOSH values** in US units; the SDS of your product may differ.
