How to read the part number

Part	Meaning
Format	AN380-<dash>
Example	AN380-2-2 — 1/16 in diameter, 1/2 in long (listing row)

Notes

- Diameter and length are those of the listing, in inches (fractions as printed). A dash in the length column means the length is not legible in the listing.
- In the listing, each row gives the number of the same diameter and length in the MS24665 and AN series, side by side.
- Use the MS24665 number for new orders where the drawing allows it.
