As the maker lists them. Inches are the maker's figures and are official; millimetres in brackets are converted (inches × 25.4) and are not official.

Notes

- Tested up to 500,000 cuts, as stated on the maker's pages.
- The capacity is for low carbon steel. The maker's pages give no figure for aluminum or stainless.
- The catalog listing linked to this sheet (a three piece set) does not name the maker. It is the same type, not a confirmed Wiss set, and the figures here apply only to the part numbers on this sheet.
