Every part number in the maker's tables. Inches are the maker's figures and are official; millimetres in brackets are converted (inches × 25.4) and are not official. A dash means the maker does not publish that value for that part.

Notes

- Handi-Klamps are for clamping a wide range of surfaces, shapes, thicknesses and materials.
- The length column is body length on the side grips and overall length on the Handi-Klamps. Handi-Klamp jaws are rubber, 5/8 in (15.88 mm) wide.
- The catalog listings linked to this sheet (side clamps, 3/4 in opening and 1 in reach) do not name the maker. They are the same type, not confirmed Kwik-Lok parts, and the figures here apply only to the part numbers on this sheet.
